COACH YOUR TEAM TO SUPERCHARGED SUCCESS PROGRAM DESCRIPTION

Presenters: Marci Moore and Pam Williams
Title: Chief Innergy Officers
Company: Innergized!TM, Inc.

In today's hectic and rapidly changing environment, it can be difficult for managers to find good people and even harder to retain them. If you want to increase retention and improve your team's productivity, try a coach approach. Learn specific coaching skills, hear success stories, and practice techniques in role play situations. Get in touch with your inner coach and leave with practical ways to use this approach to build relationships, communicate more effectively, and create an environment of trust and accountability.

Marci and Pam use customized and humorous audience interaction, personal stories and real-life examples to create an inspiring and memorable learning experience for attendees.

Benefits and Learning Objectives

1. Learn the critical importance of managing and coaching the "whole person," not just the "how" and the "what."
2. Use coaching skills with more confidence.
3. Create a workplace environment of trust, accountability and productivity.
